Instructions

Work in small groups.
1   You need a dice for each group and a counter for each player. Put all the counters on the *Start* square.
2   Take turns to throw the dice and move the correct number of spaces. Do the task in the square that you land on within 30 seconds. If you can't do the task or you get it wrong, you have to go back one space and the turn passes to the next player.
3   The first player to reach the *Finish* square is the winner.

Adjectives

high-definition	user-friendly	good value
helpful	reliable	latest
high-tech	late	faulty

Nouns

camera	website	products
staff	service	technology
gadget	delivery	goods

Instructions

1 Work in small groups. Play *Memory.* Shuffle all the cards and put them face down on the table. Take turns to turn over two cards. If they are a pair, make a sentence and, if you make a good sentence, keep them and take another turn. If not, turn them back over again, and the next person takes a turn. You need to try to remember where the cards are placed to find pairs. When all the pairs have been found, the person with the most cards is the winner.

2 Work with a partner. Write down some more examples of words to do with products and services. (Think of examples from your own language and, if necessary, use a dictionary to help you.) The pair with the most examples wins.
