

Contents. Physics and Chemistry 4.º ESO

| APPENDIX. Mathematical tools | | |
|---|--|---|
| UNIT | CONTENT | FINAL SECTIONS |
| 1 Scientific practice | <ol style="list-style-type: none"> The scientific method What can we learn from tables and graphs? Base and derived quantities Dimensional analysis Expressing the results of a measurement Scalar and vector quantities Working in a physics and chemistry laboratory | Revision activities Science practical Testing a scientific hypothesis |
| | | Work on your key competences LS The evolution of scientific thinking |
| BLOCK I | MATTER AND HOW IT CHANGES | |
| 2 The atom and the periodic table | <ol style="list-style-type: none"> First atomic models and radioactivity How can we identify the atoms of an element? Atomic mass Atomic spectra: a problem for Rutherford's model The atomic shell model Classification of chemical elements: the periodic table Types of chemical elements. | Revision activities Science practical Characteristic properties of chemical elements |
| | | Work on your key competences LS The discovery of the atom |
| 3 Chemical bonds | <ol style="list-style-type: none"> Chemical bonds Covalent bonds Intermolecular forces Ionic bonds Metallic bonds Amounts of substances: the mole and molar mass | Revision activities Science practical Properties of substances and chemical bonding |
| | | Work on your key competences LS The applications of the elements and chemical compounds in engineering and sport |
| 4 The carbon atom | <ol style="list-style-type: none"> Characteristics of the carbon atom Carbon bonding Formulas in carbon chemistry Properties of carbon compounds Hydrocarbons Oxygenated compounds Nitrogen compounds: amines Interesting carbon compounds | Revision activities Science practical Investigating the existence of carbon in a compound |
| | | Work on your key competences LS Recycling plastics |
| 5 Matter and its properties | <ol style="list-style-type: none"> What is matter? The behaviour of gases The general gas law Classification of material systems Pure substances and solutions | Revision activities Science practical Separating the components of an alcohol and water solution |
| | | Work on your key competences LS Protecting the Earth's atmosphere |
| 6 Chemical reactions | <ol style="list-style-type: none"> The reaction mechanism Mass in chemical reactions Writing chemical formulas Reaction stoichiometry Rates of reaction Endothermic and exothermic reactions Types of chemical reactions The chemical industry | Revision activities Science practical Studying a neutralisation reaction |
| | | Work on your key competences LS Chemical reactions in our daily lives |
| APPENDIX. Inorganic chemical formulas and nomenclature | | |
| PROJECT I LS | Chemistry and its implications for technology, society and the environment | |

| BLOCK II | | INTERACTION | |
|--|--|--|--|
| UNIT | CONTENT | FINAL SECTIONS | |
| 7 Rectilinear movement | <ol style="list-style-type: none"> 1. Position, trajectory and displacement 2. Velocity 3. Acceleration 4. Uniform rectilinear motion (URM) 5. Uniformly accelerated rectilinear motion (UARM) 6. Vertical movement | Revision activities Science practical Galileo's experience | |
| | | Work on your key competences LS Kinetics in sports | |
| 8 Las fuerzas y los cambios en el movimiento | <ol style="list-style-type: none"> 1. Forces and their effects 2. Composition of forces 3. Newton's laws of motion 4. Weight as a force 5. Friction force | Revision activities Science practical Factors affecting frictional force | |
| | | Work on your key competences LS Frictional and action and reaction forces in everyday situations | |
| 9 Circular motion and universal gravitation | <ol style="list-style-type: none"> 1. Uniform circular motion (UCM) 2. Centripetal acceleration 3. Kepler's laws 4. Newton's law of universal gravitation 5. Newtonian synthesis 6. Electric and magnetic forces | Revision activities Science practical Calculating the acceleration of gravity, g , using a simple pendulum | |
| | | Work on your key competences LS Space junk | |
| 10 Forces in fluids | <ol style="list-style-type: none"> 1. Pressure 2. Hydrostatic pressure 3. Fundamental principle of hydrostatics 4. Pascal's principle 5. Atmospheric pressure 6. Buoyancy | Revision activities Science practical Testing Archimedes' principle | |
| | | Work on your key competences LS Meteorological phenomena | |
| PROJECT II LS | The laws of physics and road safety | | |
| BLOCK III | | ENERGY | |
| 11 Work and mechanical energy | <ol style="list-style-type: none"> 1. Work and energy 2. Work done by a constant force 3. Power 4. Mechanical energy 5. Conservation of mechanical energy 6. The general principle of conservation of energy | Revision activities Science practical Verification of the principle of conservation of energy | |
| | | Work on your key competences LS Energy conservation in an amusement park | |
| 12 Heat | <ol style="list-style-type: none"> 1. Another way of exchanging energy: heat 2. Amount of heat transferred and temperature change 3. Amount of heat transferred in phase changes 4. Other effects of heat on bodies: expansion 5. Equivalence between mechanical and thermal energy 6. Applications of the transformation of thermal energy into mechanical energy: heat engines | Revision activities Science practical Measurement of specific heat capacity | |
| | | Work on your key competences LS Estimating our energy consumption | |
| 13 Light and sound: waves that transfer energy | <ol style="list-style-type: none"> 1. ¿Qué es una onda? El movimiento ondulatorio 2. El sonido: una onda mecánica longitudinal 3. La luz: una onda transversal | Revision activities Science practical Acoustic resonance | |
| | | Work on your key competences LS Stop noise pollution | |
| PROJECT III LS | How much energy do we consume everyday? Responsible use | | |
| APPENDIX. The periodic table | | | |
